IDENTIFIERS	Broome Community College NY

ABSTRACT

The results of a survey administered to the 1991 graduates of Broome Community College (BCC) in New York are provided, based on the number of degrees awarded (N=993). Introductory material summarizes the survey methodology and highlights the following key findings, based on a 92% response rate: (1) overall, 52% of the graduates were employed, and 4% were unemployed; (2) 42% transferred to four-year colleges or to technical schools; (3) 87% of those employed were working in Broome County or the Southern Tier; and (4) 74% of those who transferred attended colleges in the State University of New York system. Next, a profile of the class of 1991 is provided, including comparative data and classification by type of degree awarded; geographic patterns of employment; the top 12 employers of BCC graduates; the relationship between job title and academic curricula; geographic patterns of transfer; and the rank order of the top 10 upper division schools attended. The next section, comprising the bulk of the report, consists of employment, salary, and transfer information for graduates from the following fields: business; computer studies; engineering and technology; health sciences; liberal arts; and special career programs. Comparative data for the classes of 1986, 1988, and 1990 are provided for each field of study. Finally, transfer data are presented, listing BCC major, major applied for, and grade point average by receiving senior institution. The survey instrument is attached. (JMC)

INTRODUCTION

Ninety-four percent of the class of 1991 at Broome Community College found employment or transferred for further education, according to the annual survey conducted by the Placement Office.

- 52% were employed leaving an unemployment rate of 4%.
- 42% transferred to four year colleges or technical schools.
- For those employed, 87% are working in Broome County or the Southern Tier.
- For those who transferred, 74% attend colleges in the State University of New York System.

These statistics and others are outlined on the pages that follow. All statistics in this report are based on a 92 percent response to the survey and reflect the graduate status as of October 11, 1991.

The survey instrument can be found on the last page. The method of data collection proceeded as follows:

1. Administered at the May 24 graduation rehearsal.
2. Mailed to those not attending the May rehearsal with a June 14th return requested.
3. Phone calls made during June and July to those who didn't respond.
4. Second mailing sent on July 12th to those who indicated they were working a part-time temporary position, unemployed or unsure of transfer plans. In addition, second mailing went to those who reported no information, with an August 2nd return requested.
5. Second phone calls made to those with no information or incomplete information.
6. Data obtained from the above steps was sent to Department Chairpersons asking for information they could add with an October 4th return requested.
7. Statistics were compiled with all data included up to October 11, 1991.

"NA" refers to information which is "not available" due to insufficient response or a non-existent program. "Unavailable for employment" includes those who travel, marry and decide not to work, or otherwise prefer not to seek employment at this time.

There were 993 degrees awarded at commencement exercises in May. The actual number of graduates was 988, as five graduates received more than one degree. All statistics are based on 993 - the actual number of degrees awarded.

Salary information is based on entry-level salaries in full-time positions directly or indirectly related to area of study. Second or third shift differentials are not included. Additionally, all percentage figures were rounded to the nearest whole number which accounts for total figures between 99 and 101.

Recognition is given to Mary O'Brien, Joan Finney and Margaret Ross for their persistent efforts to obtain data; and to Ida Kenyon for her diligence in entering all data and typing the entire survey.

Anne Scott
Director of Placement
